

Huawei Unveils *MediaPad* – World's first 7-inch Android 3.2 Honeycomb Dual-Core Tablet

MediaPad set to transform consumers' entertainment experience

Singapore 20 June 2011: Huawei, a leading telecom solutions provider, today launched the Huawei MediaPad, the world's first 7-inch Android 3.2 Honeycomb tablet. The MediaPad is a complete entertainment powerhouse driven by Qualcomm's dual-core 1.2GHz processor, supported by Huawei Device's Hi-Space cloud solution and Google Android Market. The MediaPad provides a fabulous user-experience in a stylish, high-performing and ultra-portable package.

The MediaPad is Huawei Device's smartest, slimmest and lightest tablet yet, measuring just 10.5mm (0.4 inches) deep and weighing approximately 390g (0.86 pounds). It supports 1080P full HD video playback and features a 1.3 megapixel front facing camera and 5 megapixel auto focus rear facing camera with HD video recording capabilities. With HSPA+ 14.4Mbps and high-speed WiFi 802.11n Internet connectivity, the MediaPad doesn't just entertain – it keeps you connected.

“With the Huawei MediaPad, we are demonstrating yet again that design, functionality and performance is within anyone's reach. The 7-inch tablet remains the preferred size for portability and Android Honeycomb 3.2 is dedicated to enhance the full potential of 7-inch tablets. Huawei is very pleased to be the first to offer this package to consumers globally.” said Victor Xu, Chief Marketing Officer of Huawei Device. “The MediaPad opens up new worlds of entertainment for consumers by removing the barriers to tablet ownership, enabling access to a truly high-quality mobile entertainment experience fully integrated with cloud-based internet content.”

An Out-of-this-World Entertainment Experience

The MediaPad supports HSPA+ data services, Flash 10.3 videos and comes preinstalled with applications such as Facebook, Twitter, Let's Golf and Documents to Go. With the 7-inch IPS touch screen, the MediaPad offers a standout visual experience for photos,

movies and applications. Entertainment and gaming experience are taken to the next level with the MediaPad's 1.2GHz Dual-Core processor, HD playback and HDMI port.

Expansion of Huawei Device's Smart Offerings

The MediaPad builds on the global success of the IDEOS S7 Slim tablet and cements Huawei Device's ability to cater to the explosive demand for tablets. According to the International Data Corporation, sales in the tablet market are expected to increase more than fourfold in the next two years. The MediaPad will be showcased at Huawei's "Smart for Transformation" booth at CommunicAsia 2011 in Singapore. Along with Huawei's latest range of smart devices, the MediaPad is a prime example of Huawei Device's focus on the power of practical innovation.
